

# ▶ Assistance to Investment Projects

## Helping you manage compliance issues

### BUSINESS CHALLENGE

Setting up and developing in a new market is a challenge made even more difficult by a range of complex regulations specific to the country. Identifying the various Quality, Health & Safety and Environmental (QHSE) regulations of the targeted country, and integrating them into your new project is a complex task you can't afford to get wrong.

### SOLUTION

#### What is Assistance to Investment Projects?

Whether you build a new site, acquire a plant or invest in a new merger, Bureau Veritas can deliver the right expertise to help you efficiently drive your projects and optimize your investments. We can help you turn them quickly into operational units. We achieve this mainly through an intimate local understanding of the market specifics, identifying the right contacts and facilitating relations with administrative bodies, verifying the conformity of the site and overcoming technical risks.

#### What are the key benefits?

- Keep within the budgeted project investment;
- Anticipate potential risks at an early stage;
- Deal with risks and help ensure success of your project.

### WHY CHOOSE BUREAU VERITAS ?

**Recognition** ■ Founded in 1828, Bureau Veritas is a worldwide leader specialized in QHSE and social responsibility services. Certified to ISO 9001 for all of its activities throughout the world, the company maintains an active participation within professional authorities, for the development of international standards and regulations.

**Knowledge and Expertise** ■ Technical knowledge and availability of our qualified local teams, able to provide packaged and targeted information, are strengths appreciated by our clients.

**Network** ■ With a network of 700 offices and laboratories and over 26,000 employees in more than 140 countries, Bureau Veritas is able to effectively deal with the unique nature of each mission.

**Personalized service** ■ Bureau Veritas commits its best specialists to work by your side. Our global service offering enables you to succeed abroad, overcoming all the regulatory, administrative and technical constraints, step by step.

BUREAU  
VERITAS

Move Forward with Confidence

## OUR APPROACH

Our teams of specialists are comfortable with all the procedures of authorization, certification, checking and inspection specified to the market. Whether it concerns setting up an industrial presence, acquiring the site or exporting products or equipment, Bureau Veritas has what it takes to accompany you every step of the way:

### 1. Preliminary studies:

- Regulatory studies;
- Soil analysis;
- Impact and danger studies;
- Assistance in compiling the specifications that help with obtaining authorization;
- Project management;
- Assistance in writing the Safety Manual;
- Assistance in choosing a supplier;
- Risk Assessment;
- Technical assessment of project documentation.

### 2. Concept stage of project:

- Integration of constraints relating to regulations and norms (environment, health & safety, etc.);
- Drawing up dossiers for Environmental Protection, Safety and Worksite Activity Management (ICPE, IPPC);
- Drawing up the Dossier for Subsequent Intervention on the Work;
- Pre-verification of suppliers' norms;
- CE marking for the equipment and process;
- Technical design review.

### 3. Fabrication/Construction:

- Waste management assistance;
- Measurement of the building site's harmful effects;
- Management of the interaction of services on the building site and checking of the Health & Safety requirements;
- Scaffolding verification;
- Training of all personnel on the site;
- Commissioning, manufacturing, follow up with respect to deadline and verification of requirements and CE norms;
- Supervise technical implementation;
- Verification of suppliers.

### 4. Starting production/operation:

- Initial and periodic regulatory verifications;
- Safety training;
- Checking final assembly including verifying all documentation (certificates of conformity, etc.);
- Performance measurement;
- Certification of Conformity of Installations.

### Acquisition project:

- Environmental assessment (soil, air, water studies and testing, waste analysis, ecological impact assessment);
- Verification within the constraints of the regulations;
- Risk evaluation (flood, seismic, etc.);
- Fire safety audit;
- Inspection of existing buildings for dangerous materials (asbestos, lead, etc.);
- Energy production audit;
- Property Condition Assessment and repairs forecast;
- Machinery / electrical audit;
- Audit of risks related to dilapidated buildings.
